CERTIFICATE OF CLEANLINESS

This is to certify that our flexitanks are being produced in clean room according to ISO 22000 HACCP norms and conform to both the Packaging Waste Regulations and Food Approval legislation listed below.

The Packaging (essential requirements) Regulations SI 2003/1941

1. Noxious or Hazardous substances must be minimised in emissions, ash or leakage from incineration or landfill. There are no noxious substances present in polythene and polypropylene.
2. Products are recoverable through at least one of the following:-
 - Material recycling.
 - Incineration with energy recovery.All LiquA products are recoverable through all of the above.
3. Heavy metal limits applying to Cadmium, Mercury, Lead and Hexavalent Chromium of 100 parts per million are not exceeded.

All materials used in the construction of our products are fully compliant with the requirements of EC Directive (94/62/EC). The materials do not contain any Mercury, Cadmium, Lead, or Hexavalent Chromium.

Food Approval Legislation

Our products are manufactured from materials which conform to the following legislations/regulations:

USA FDA regulations 21 CFR 177.1520 Polyolefin's.

EU Directive 2002/72/EC relating to plastics materials and articles likely to come into contact with foodstuffs published 10/2011/EC

We hereby confirm that we comply with the requirements according to Regulation (EC) No 1935/2004, Regulation 10/2011/EC and amendments as well as to consumer goods ordinance and to German Food and Feed Code (LFGB) respectively relevant versions.
